ADC

Research Data - Sharing

Let's review some of the items everyone needs to consider when Sharing and Reusing Data

Data Sharing Agreements

There are many resources available to use to create your data sharing agreement.

Recommendation is to work with your Data Specialists at your institution:

- Library – RDM Specialist

- Data Strategy Staff

- Funding agency

Data Sharing Agreements

Reframe the situation – you, as a researcher, need to think about how you will make your data re-usable and the agreements around this.

BUT

How many data agreements – have YOU as a user agreed to?

- Have you READ it all? What did you agree to?

- Let's spend some time on a few and maybe that will help you think about your Data Sharing agreements?

Data Agreements

In our everyday lives – we have seen and agreed to MANY data agreements – knowingly or not.

WHAT have we agreed to?

Data Agreements - EXERCISE

In small groups or on your own – please pick one of the following links (on the next slide). ONLINE attendees – small groups?

1. Review the agreement – the Data section
2. Do you agree with what they are collecting?
3. Do you agree that they are using the collected data appropriately?
4. IF you are a user of this platform – do you remember reviewing it?

Data Agreements - EXERCISE

Data Agreements - DISCUSSION

LACTANET

1. Review the agreement – the Data section
2. Do you agree with what they are collecting?
3. Do you agree that they are using the collected data appropriately?
4. IF you are a user of this platform – do you remember reviewing it?

Data Agreements - DISCUSSION

NETFLIX

1. Review the agreement – the Data section
2. Do you agree with what they are collecting?
3. Do you agree that they are using the collected data appropriately?
4. IF you are a user of this platform – do you remember reviewing it?

Data Agreements - DISCUSSION

FACEBOOK / META

1. Review the agreement – the Data section
2. Do you agree with what they are collecting?
3. Do you agree that they are using the collected data appropriately?
4. IF you are a user of this platform – do you remember reviewing it?

Day 1: Conclusion

When we do research – our goals have been focused on OUR endpoint

We need to start reframing our goals beyond OUR endpoint – sharing and re-using the data we've collected

TO do this though we need to ensure that others can understand our data by incorporating:

- Metadata

- Data Governance practices

Day 2

We'll spend the morning talking about FAIR data and how to start really thinking about our data as a valued asset and commodity that lives BEYOND our project.

In the afternoon for our in-person attendees – a tour of the Dairy Facility to better understand ALL the data being collected. Online attendees we will provide links to videos of our facility.

Finish Day 2 with a discussion with all participants about some of the challenges of live data collection.

Day 2

Contingency plan – in case of snow event

We will email ALL participants before 7am with online links to continue our discussion. The day will proceed as planned – just online.

Thank-you!!
